

HEADLINE: Bank Bill Payments

Simplify your online bill payment process! After you discover the ease, convenience and freedom of the Xpress Bill Pay system, you'll never want to return to banking the old-fashioned way!

Most companies say the hardest part about online bill pay is that the system is error prone—and truly not paperless. Now it is possible for paperless transactions, from the customer, to bank, to merchant. Instead of processing payments manually, your organization gets the payment data from the bank fully corrected—all done virtually. Instead of waiting for data to be processed by hand, real-time payments are complete, accurate, and already in your bank.

SUBHEADING: Benefits

No more paper checks in mail

You will no longer need to spend hours each day entering payment data into your system and filing checks away. What used to take as long as 3-4 hours, now only takes a few minutes.

Eliminates errors

We remove all the issues caused by the bank and the online banking system without you having to lift a finger. Our system automatically corrects all wrong account numbers, address information, and missing information. We fix all of the problems from the customer end to the information processed by the bank.

No more hassles

We format the bills so they go directly into your accounting system with all payment issues revised. We are linked directly to you and can provide real-time payment information. The online payment process is as easy and simple for you as it is for your customers.

Data stored securely

We receive all of the data and customer payment information from the bank and keep it securely stored. We keep track of current bills, past bills, and keep all error corrections in our system.

When it comes to accepting payments online, Xpress Bill Pay helps you stay one step ahead. Sign up for Xpress Bill Pay and manage your online bill payments accounts virtually anytime, anywhere.
